EDUCATION

University of Technology and Applied Sciences (UTAS)

Expected 2027 – 2028

B-Tech · Data Science and Artificial Intelligence

GPA: 3.95 / 4.00

TECHNICAL SKILLS

Languages	Python · C++ · SQL · JavaScript · HTML/CSS · PHP
Frameworks	MERN Stack · scikit-learn · NumPy · Pandas
Data Viz	Matplotlib · Plotly · Seaborn
Big Data	HDFS · Apache Hive · Apache Pig · HBase · Apache Sqoop
Learning	TensorFlow · PyTorch
Tools	Git · GitHub · Jupyter · VS Code

RESEARCH

Evaluating and Comparing Hyperparameter Optimization Methods for Selecting Machine Learning Models

2025 – Present

UTAS · Presented at NextGen: Innovators 2026 — College of Computing and Information Sciences, May 2026

Systematic study comparing HPO strategies (Grid Search, Random Search, Bayesian Optimization) across multiple ML architectures to identify best practices in terms of performance and computational cost. Research accepted and presented at the NextGen: Innovators 2026 academic conference.

PROJECTS

NumMy

Pure Python · NumPy
re-implementation

Ground-up reimplementation of NumPy's core array operations in pure Python — covering n-dimensional arrays, broadcasting, vectorized math, and slicing — demonstrating deep understanding of numerical computing internals.

github.com/Aminpatra/NumMy

DocFusion — Intelligent Document Processing

Python · OCR · Anomaly Detection

End-to-end pipeline for scanned receipts and invoices: OCR extraction, structured field parsing, and anomaly detection to automatically flag inconsistencies in financial documents.

github.com/Aminpatra/docfusion-intelligent-documents

Planora — Smart Study Planner

React · Node.js · MongoDB · Express
· AI API

MERN stack study planning application enabling students to organize courses and assignments, featuring an integrated study timer and AI-powered personalized study schedule generation.

github.com/gheathwahab/planora

ISC (International Student Club) Website

HTML · CSS · JS · PHP

Full web-based management system consolidating member registration, event scheduling, announcements, and club activity tracking in one platform for the university's International Student Club.

iscwebsite.page.gd

TEACHING & MENTORING

Introduction to Programming — Guest Instructor

2025

UTAS Techno Initiative

Delivered an introductory programming course for university students as part of the UTAS Techno department initiative, demonstrating technical communication and commitment to peer education.

CERTIFICATIONS & EVENTS

Machine Learning Specialization — 3 Courses DeepLearning.AI / Stanford University · Coursera · Jun 2026
